

OVERALL EXPERIENCE-

ISA JOURNEY

The ISA journey brought about a great a value addition in the lives of students, prepared each one of them to keep abreast with rapidly changing world. Registering with the British Council for the International School Award (ISA) had been our first step towards global dimension.

Teachers developed collaborative curriculum projects envisaging celebration of significant international days to engage themselves with global issues, enriched teaching and learning and brought world into classroom fostered team building, innovation and project management. Seven themes transformed and guided us towards more determined objectives. British council provided us a global platform to interact with various countries under three of our projects which wasn't possible earlier.

We became a part of global community and learnt how to connect to the global world. Through the collaborative activities we explored the beauty and benefits of various herbal plants and learnt the ways to stay healthy in natural way.

Students even enjoyed “Animals Around The World” activity. They enjoyed making attractive animal masks. Presentation grabbed their attention providing knowledgeable information about their young ones, habitats, food habits, etc. The various projects under ISA assessed the students’ performance.

Completion of the project has resulted in the transformation of every student’s personality. The journey has been exuberant and a rich learning experience for all of us to envision and create a world better than the one we inherited.
