

Free HB Detection Camp and Anemia Screening Awareness Programme

"Health is the soul that animates all the enjoyments of life, which fade and are tasteless without it."

Little Flowers International School and D.R Patel Memorial Trust, in collaboration with Healthy India Trust, hosted a free HB detection camp and anemia screening awareness programme on April 20, 2024. The event saw active participation from students of classes 3 to 10. Anemic children received expert consultation and medication advice, ensuring timely intervention and support. This initiative highlights the commitment of educational institution towards promoting community health and well-being.

Such endeavours not only detect health issues but also provide essential care, emphasizing the importance of proactive healthcare initiatives in society.
