ISA ACTIVITY-2

Our Herbal Friends

"Believe that for any illness or ailment known to human, that God has plant out here that will heel it. We just need to keep discovering the properties of natural healing."

The project carried in the month of August,2018 taught our students to respect 'Mother Earth' which has a miracle called life and created awareness to advocate the idea of protection of environment and safety of our global community.

The students of IX and X became familiar with the different herbal plants available in India, Bangladesh and Nepal through a research activity they carried out under the guidance of teacher.

Our work is the presentation of our capabilities. Therefore, a Skype session was conducted with school of Nepal highlighting the role of different medicinal plants.

Exploring the knowledge of students a Map worksheet was conducted in LFIS. This activity was exchanged with partner country.

A mass assembly was conducted where students talked about the importance of medicinal plants of India, Nepal and Bangladesh.

The students of classes IX and X planted as many as 45 potted plants, including Aloe Vera, Tulsi, Mint, Fenugreek, Neem.
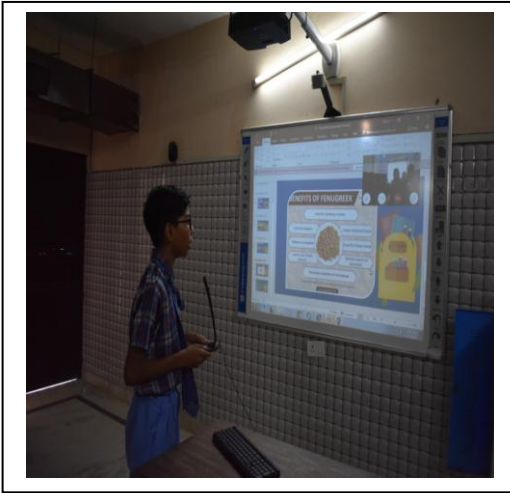

This garden was open for the parents on 19th and 20th of August, 2018. The students had given extensive knowledge to them under the guidance of concerned teacher.

A Inter House Quiz conducted under ISA Activity at LFIS auditorium. Participants of Lily house Akshit (X-B) and Anjali (IX-B) bagged the first position. Marvelous performance was given by participants of all houses.

ISA, Inter-School Quiz on Medicinal Plants under Our Herbal Friends on 27-08-2018.A Skype quiz session was conducted with

Nepal school "Pamir International Academy".

The students of both the school enthusiastically participated and eloquently asked questions from each other.

This quiz was extensively informative and knowledge enriching.

The students participated joyfully and worked together, through this activity students gained knowledge, experience and international exposure.
