

ACTIVITY-3

RISE ABOVE PLASTIC (COLLABORATIVE)

Don't use plastic and be fantastic.

Comparative study was carried out under ISA activity-3 “RISE ABOVE PLASTIC”, a collaborative activity. The activity had great impact on the minds of the students. They became familiar with the various plastic waste management techniques adopted in India, Sweden and Egypt. Thereby, carrying forward their knowledge to international level. Almost 210 students of VII and VIII classes were the active participants. The students explored their best to manage the mushrooming plastic waste. The students even exhibited their artistic skills by preparing comparative sheet showing the plastic waste management techniques of the three countries.

“BEST OUT OF WASTE” is one such craft which follows environmental friendly principle and at the same time creates useful and picturesque objects out of waste plastic products. Little hands and imaginative minds came together in a creative burst of energy. Mind-blowing, beyond expectation, fantabulous ideas were demonstrated by students. They prepared very creative and innovative models and art items from different waste materials.

PowerPoint presentations provide professional and visual look. It captures the attention of the audience. Bearing this in mind, the students VII and VIII came up with attractive presentations. Best part was that students used this PowerPoint presentation show to share the techniques of managing plastic waste of various countries with the peers.

The aim of the public survey was to determine the thoughts and ideas of the public regarding waste management. The students were divided in two groups of 10 each along with the teachers. The activity was beyond the textbook. The students surveyed the general public.

With the objective of developing the cognitive skill of the students, Let's Check worksheet had been conducted. Printable worksheets were provided to the students of VII and VIII. The questions were based on the lab session and PowerPoint session conducted before. It increased general awareness amongst the students .

Under Environmental Talk the students explored the relationship between the natural world and the everyday lives of people. The environmental talk was an easy way to make students to become an environmental steward and creation of brighter future. The highlight of the event was the pledge to protect the environment from the use of plastic.

The students had Skype session with the students of "Pamir International Academy, Nepal". The students were excited to talk to their counter parts from another country. The students satisfied their curiosity with barrage of questions which students of Pamir answered earnestly. The students discussed variety of ways to reduce pollution.
