

ISA ACTIVITY-7 FRUITS EXOTICA (IN-HOUSE)

In the academic session 2018-19, with the support and motivation of management, an array of activities were held in the school for “Fruits Exotica”.

A research worksheet was performed under the guidance of teachers. Different fruits like Pine Apple, Star Apple and Carambola were studied. Students presented their it on A3 sheer with beautiful pictures.

A worksheet activity enhanced the general knowledge of the students. The worksheet consisted of questions in respect to national symbols, flags, animal, monuments, and currency of USA, Australia and India.

The students were given the opportunity to recite their poems in front of all students and the teachers in the activity hall. The main motive of the activity was to sensitize children about importance of fruits in our daily diet. All the presentations very aptly depicted the idea that fruits are a wonder food

The slogan writing activity was really helpful in bringing out the imaginative ideas, creativity and expression of the young minds. The slogans framed by the students displayed benefits of fruits, encouraging people to eat fruits for a healthy lifestyle.

In 'Map Worksheet', the students had to locate the given countries against the specific exotic fruits and answer the related questions. The map worksheet was based on the research work already performed by the students. On the basis of that research work they were asked to complete the 'Map Worksheet'.

Students showcased their excellent communication skills through this skit. Their tagline was- "Fruits are nature's candy. We should replace the junk food with fruits die." Children got the opportunity to celebrate the richness and depth of human expression in all of its forms.
